

St John of God Hospital Subiaco

Development Application | Strategic Advice | Advocacy

St John of God Healthcare is Australia's third largest private hospital operator, with six hospital campuses located across Western Australia.

Planning Solutions has worked together with St John of God Healthcare on many of their hospital campus projects of varying scale. This includes securing the development approval for Stage 1 of the Subiaco hospital redevelopment from the Metro West Joint Development Assessment Panel in January 2018.

Subiaco hospital is the flagship hospital of St John of God Healthcare. The application for stage 1 of the hospital redevelopment related to a major expansion of a multi-storey car park to secure the car parking capacity for the future stages of redevelopment. Development approval was obtained from the Metro West Joint Development Assessment Panel. Planning Solutions was successful in obtaining modifications to the conditions that the Town of Cambridge had recommended be imposed, which would have required substantial contributions to be made to infrastructure upgrades and payment for the loss of on-street car parking.

Planning Solutions, with St John of God Healthcare, is moving forward with planning for the redevelopment of the Subiaco hospital.

Project Summary

Client:	St John of God
Location:	St John of God Hospital Subiaco
